

Grease Goblin

**LAST SEEN:
Loitering in Sinks
and Drains**

**WANTED FOR:
Causing Sewer
Overflows**

Please be aware of what is put down your sinks and toilets. We are experiencing issues with grease build up in the manholes, drains, and wastewater treatment plant. Please note that under no circumstances should grease or oils be poured down the sinks or toilets. Also creating issues in the system are paper towels, baby wipes, shop towels, and diapers (baby and adult). To help us better serve you, please make sure that these items are being properly disposed of so we can keep the drains and sewer system clear.

The sink should never be the end zone for **fats, oils or grease.**

Instead, make the right call to dispose of them properly.
